Welcome

This is our Winter Magazine 2014. A magazine with a carefully chosen collection to present your name and message in a perfect way. Gifts to distinguish, gifts to differentiate! The end of the year period is an ideal moment to look back and underline a perfect relationship.

This magazine contains two sections, part 1 (page 1-69) is our mood photography designed especially to inspire you to make the right selection. part 2 (page 70-95) shows you all further relevant technical specifications and prices.

Behind the scenes

XD Design studio in Shanghai

Dear reader,

When you receive this magazine, the end of the year will probably be far from your mind. After all, there are still a few months left, and these months are also the busiest months for many companies and institutions. But that is why it could be wise to start thinking about how you want to show clients, employees or colleagues that you appreciate their business or performance.

A well-selected gift says more and has a bigger impact than you might think! Recipients may use it or see it on a daily basis; not only in a professional setting because carefully selected gifts also tend to be used in people's private lives.

What is a successful gift? Firstly, the recipient must be surprised and think that a lot of thought has gone into it! Naturally, this can be achieved in many ways. For instance, this could be reflected by choosing a particular type of product or (eco) material. The shape or slogan, or a combination of the two, can also be linked to your company or a particular objective and all this needs to be done within a certain budget. That is where the challenge lies. This is often difficult to realise but we can offer effective advice based on our track record as an experienced supplier!

But other factors also play a role in the success of a gift! How do we approach the logo and any slogans? What is the objective? Advertising on, for example, a beach ball or sports bag requires another approach than an end-of-year gift.

In terms of the sports bag, we want to reach as many people as possible so the message is printed in a large format. When it comes to gifts, it is essential for the message to be subtle so the gift is more likely to be used in the private lives of your target group and have a positive impact on your company image for many years to come!

Not Just for Holidays

Mulled wine is not just a holiday beverage. It is a welcome drink at the end of a blustery autumn day or on a chilly March evening. Serve it with some cheese and crackers for a welcome snack in front of a roaring fire. Mulled wine is perfect for entertaining during all cold months of the year. This versatile drink is a must have for your recipe collection.

Glu

GLUHWEIN

- 1 litre bottle red wine
- 75g sugar (to taste)
- 1 tsp whole cloves
- 1 tsp ground cinnamon or stick cinnamon
- juice of 1 orange and 1 lemon

Pour wine into a saucepan and add all ingredients. Heat until nearly boiling and strain into Glu wine set. Enjoy!

2014

Benefit of Lemon Water

Lemon water gives your immune system a boost. Vitamin C is like our immune system's jump start cables, and lemon juice is full of it. The level of vitamin C in your system is one of the first things to plummet when you're stressed, which is why experts recommended popping extra vitamin C during especially stressful days.

SUSTAINABLE RECYCLABLE RESPONSIBLE

Meet XD Apparel. A new brand. XD Apparel is a sustainable, high performance outerwear label of high quality garments with the lightest environmental footprint.

XD Apparel is starting with a clean slate. This means we have a unique opportunity to make garments the way they ought to be made. Our goal is to use existing resources, in as much as possible, and our long-term ambition is to make them fully recyclable. This is the way we intend to make a difference in apparel and lead the way to a more sustainable world.

All of our energy and creativity is focused on a clear goal: to make high quality products in materials that reduce or limit our impact on the planet.

We use bluesign® certified materials that are ecological, recycled, or recyclable and made without toxic chemistry, and our garments are manufactured in CSR compliant factories. Our high precision and clean tailoring ensures perfect fit and wearer comfort.

Tradeshow giveaways

Most people who attend trade shows are expecting to take home some goodies.

If you use giveaways, think critically about how that item represents your product or your company.

Giveaways are a point of contention for veteran trade show attendees. For some, it's a valid reminder of your brand. For others, it's a waste of money. Whichever camp you fall into, make sure any freebie serves a purpose.

The first Cradle to Cradle certified product in the promotional product industry!

The world population is growing very fast! From 7 Billion in 2013 up to 10 billion in 2050. For our resources today we already need 1½ planet. To satisfy our needs we need 3 planets in 2050 and that is impossible! We have to find alternative solutions. A very good option. We need to reuse our resources!

The Boom is a good example and can be dismantled easily, each part is identified and can be separated and is ready to recycle, no harmful glue involved!! Aluminum with aluminum, no mixed materials anymore!

PRINT INFORMATION

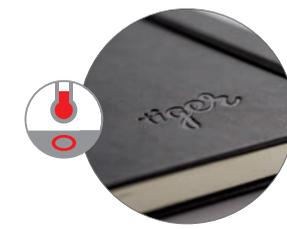

Pad printing
This method is the fastest and most accurate because it allows printing of logos with a high number of colours on usually most surfaces. Generally the print is applied on small objects made of plastic or other hard materials, on which the paint is transferred with a silicon pad.

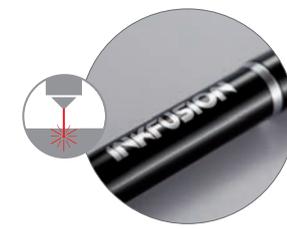

Silk screen
Silk screen printing is a stencil technique in which ink is forced through a mesh, originally of fine silk but now commercially more likely to be nylon. It's an all embracing process used on general materials, metal, plastic pens and PU (simulated leather).

Transfer
This is a digital print on a paper label, it is then specially prepared for the transfer to be applied at high temperature on the object using a hot-press.

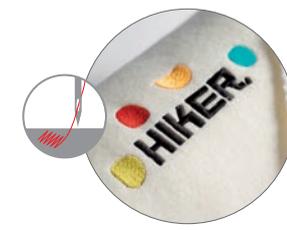

Hot stamping
This is a dry printing method in which a heated die is used to apply graphics to a surface. The logo will keep the color of the material.

Laser engraving
This technique uses a laser beam to print text, logos or drawings by engraving the object's surface. Generally it is used on metal but the same technique can also be applied with excellent results on wood or plastic.

Diamond engraving
This technique uses a small diamond to engrave a text or logo on the surface of an object. This technique is used to engrave glass items mainly.

Embroidery
This technology highlights the logo with elegance: the logo is embroidered on the object's surface. The embroidery can be made on plain/flat surfaces (clothing) or irregular/uneven surfaces such as hats, backpacks, bags, etc.

Doming
Doming is a printing technique where several materials, mostly stickers, are being applied with a transparent coating. A resin layer (epoxyresin) gives a 3-D lens effect, and depth and extra brightness to colours.
